

Ystream

FiveM Vehicle Customizer & 3D Artist | Discord Server Developer

Discord: ystream Status: Available for commissions

PROFILE

I'm Ystream, a FiveM Vehicle Customizer and 3D Artist. I work at ShiftX Performance and specialize in transforming vehicles into high-quality, optimized, import-ready FiveM mods covering the full pipeline from textures and UV mapping to poly reduction and file optimization. On the side I develop and manage Discord servers for personal interest, focusing on structure, roles, channels, and automation.

EXPERIENCE

FiveM Vehicle Customizer & 3D Artist | ShiftXPerformance

- Delivered 15+ vehicle customization commissions for FiveM server owners.
- Full pipeline: texture & material editing, UV mapping, liveries, debuging, and glow livery.
- Poly reduction and file size optimization (.yft / .ytd) for improved server performance.
- Added extras, joined parts, created 3D logos and vehicle templates.
- Integrated custom sound files; all deliveries are fully server-ready.

Discord Server Developer | Personal Projects

Ongoing

- Designed and built Discord servers including channel structure, roles, and permissions.
- Implemented bots and automation for community utilities and server tooling.
